Outpatient Programs

The House of Hope offers services that are designed to meet the individual needs of men and women to recover from alcohol and drug dependency or abuse.

Our Outpatient Program services are designed to minimize disruptions to work and educational opportunities by allowing participants to meet at convenient hours.

Intake appointments are scheduled on a first come first serve basis by calling the Intake Coordinator at 276-4840. The best time to call is Monday morning. An assessment will be completed to determine the appropriate level of care. A variety of different programs are available.

- Assessments
- Group and Individual Counseling
- Intensive Outpatient (IOP)
- Case Management / Referral Services
- Women's Specific Group
- Family Support
- Awareness Group
- Relapse Prevention
- Deaf / Hearing Impaired Services

Mission Statement

The mission of the House of Hope is to help repair the lives of those who suffer from substance use disorders.

Alcohol and drug addictions are primary, chronic and progressive diseases. Addiction may ultimately be fatal if left untreated. With appropriate treatment, progression may be interrupted and ongoing recovery begun. This concept is supported by the American Medical Association, the U.S. Public Health Service and professionals in the treatment field.

Abstinence is the primary treatment goal for any client receiving services at all House of Hope programs. "Abstinence" means total avoidance of drinking alcohol, using illicit drugs or prescription drugs illicitly. Medications prescribed by a physician and used under a physician's care may be exceptions.

Certification

The House of Hope, Inc. is certified by the Ohio Department of Alcohol and Drug Addiction Services. The staff providing services is caring and experienced in the field of chemical dependency. All clinicians are licensed by the State of Ohio.

For Intake call:
614-276-4840

Cost of Treatment

The House of Hope, Inc. is funded by the Franklin County ADAMH Board, the Ohio Department of Alcohol and Drug Addiction Services, the Columbus Foundation, the Franklin County Department of Job and Family Services and generous private donors.

Client payment is based on a sliding fee scale. Most of our clients qualify for no or reduced charges for our services.

We also accept Medicaid insurance.

Awareness Group

Individuals who meet criteria for early intervention due to high risk use or abuse of drugs or alcohol qualify for our Awareness Group. This program is geared toward increasing knowledge of drug and alcohol problem behavior. This group also helps each individual to evaluate their own drug or alcohol use and consequences.

Intensive Outpatient

Those with more significant issues including substance dependence qualify for our Intensive Outpatient Program. The sessions are held three times per week. Participants are also involved in individual sessions with their counselor.

To help our clients remain drug and alcohol free on a long term basis, completion of IOP is followed by relapse prevention group.

Women's Specific Group

The House of Hope has recognized a community need for specialized treatment for women suffering from alcohol/drug problems sometimes combined with issues such as depression, anxiety, family and relationship problems among others.

Deaf THINK POSITIVE

Deaf THINK POSITIVE helps people stop hurting self with drinking alcohol too much or using drugs. That is a disease, not the person's fault. We learn to live positive and enjoy life from counseling, art, video and theatre activities.
